20 Reasons why you want a T-L Hydraulic Irrigation System!

1. **The only system with continuous movement; uniform water application.** * No start and stop of the drive train means less wear and tear on all components. Improved water pattern without spoking.
2. **Safe and simple to operate and understand** *No high voltage on system structure.
3. **No lightning damage.** *No high voltage components on basic system structure.
4. **Minimum maintenance alignment** * NO micro switches or contactors.
5. **Alignment valve with 8 year warranty** * NO micro switches or contactors.
6. **No center drive gearboxes** *Motors coupled to final drive for higher drive efficiency
7. **No exposed drive shaft** * No crop wrapping, no U-joints with either planetary or worm drive.
8. **Gearbox warranty leads the industry**
* Planetary drive 8 years or 24,000 hours * Worm drive 8 years or 16,000 hours
9. **Speed, direction and machine management control options**
* From remote location, at pivot point or at end tower – Alarm panel also available.
10. **Conoco Hydroclear TM hydraulic fluid** * Environmentally friendly for the life of the system.
11. **Hydraulic pump** * Long service life. Speed (rpm), PSI, and flow are variable.
12. **Hydraulic tank** * Simple to maintain, no adjustments required or gauges to set.
13. **End gun booster** * Hydraulic drive – no high voltage required.
14. **End gun shut off** * Hydraulic cylinder – fast / positive on and off action.
15. **Only towable system offered with lift jacks.** * No extra mechanical jack needed or tractor required to convert towers to towable position.

Center Pivots / Linear Systems / Corner Systems / Quick Tow Systems
